tailormade joinery

## About Us

Tailormade Joinery traces its roots back to 1972 where the current senior management of Peter Gooderson, Rishy Tilsee and Moses Bengu came together in a joinery company in Pinetown, KwaZulu-Natal.

This stability of management and experience is translated into a continuing commitment to quality and innovation.

The factory at Shakaskraal, KZN, is organized into a supply chain of seven independent companies where real empowerment has taken place and uplifted the owners in skills and dignity.

All the supply chain companies are level 1 BEE compliant and Tailormade Joinery is itself, Level 1 compliant.

We are committed to comply with the introduction of the National Building Regulations, in particular, SANS 1040-XA – Energy Efficiency and energy use in the build environment.

These regulations will drive the up skilling of companies and result in improved quality which is one of the reasons we have embraced the regulations and are the leading joinery manufacturer in having our products pass the stringent SANS 613 Tests for water, air penetration and weather stability. These tests are ongoing and the remaining products will shortly comply.

We have also had our products tested by SAFEIRA at the Thermal Test Laboratory and with the results, had our products assessed to give Simulated Energy Performance ratings for U Values and the other ratings required under SANS 10400 Part XA.

Sample U Values are shown throughout the **website** product pages and for each of the items, there are available results using +/- 190 types of glass.

In all, we have a library of over 40,000 simulations which can be supplied and printed out at a moment's notice.

Many people anecdotally say these regulations will not be enforced – that is not our belief.

The Department of Human Settlements has adopted them for their housing projects and the National Regulator for Compulsory Specifications is mandated by the NCRS Act (5 of 2008) to enforce the regulations.

When something goes wrong on a project, then all involved will look to the Regulations for guidance and compliance. Using our products gives you that assurance.

This is the team that brought the original built in burglar bars to the country and now we are introducing Accoya Wood, an innovating, modifying of wood that stays as wood and uses no toxic substance.

We will use Accoya to enhance our products and guarantee the enhanced areas against decay and insect attack for 50 years.

Full details of this superb innovation can be seen by visiting [www.freedomwood-accoya](http://www.freedomwood-accoya).

As a committed South African company, our website also support our diversity of languages and have a choices for your convenience.

# U Values

You can use these maximum values for the different ranges , but for individual products U-Values please go to the website.

<i>Window</i>	<i>4mm Glass</i>	<i>4mmLow E Glass</i>
Goodwood Full Pane	5.1	3.5
Goodwood Small Pane	4.9	3.6
